HALOL NARXDA HALOL TOSH

NEOMARM – arzon estetik pardozlash materiali. DSPdan voz kechishni va qo'shimcha xarajatlarsiz qulaylikning yangi darajasiga o'tishni istaganlar uchun to'g'ri keladi. Marmar kolleksiyasi (NM seriyasi) original marmar dekorlarini o'z ichiga oladi, granit kolleksiyasi (N seriyasi) esa turli o'lchamdagi qo'shimchalar bilan klassik dekorlarni o'z ichiga oladi.

ORIGINAL ISHLAB CHIQRISH

NEOMARM original dizaynda ishlab chiqariladi. Toshning tarkibi o'zgartirilgan akril qatronidir. Komponentdan foydalanish sizga ikkita muhim afzalliklarni olish imkonini beradi: analoglardan arzonroq mahsulotlarni yaratish va sifati va tashqi ko'rinishi bo'yicha qimmat alternativalar bilan taqqoslanadigan stoleshnitsa, rakovina, interyerni qoplash uchun materialni taklif qilish. To'plamlarning rang diapazoni oljanob oq va issiq pastel qaynatilgan sutdan tortib to boy karamel va sutli shokolad rangigacha.

ISHLATILISHDA QULAY

Toshda chuqurchalarning yo'qligi mukammal sillqlik va gigienani ta'minlaydi. Bakteriyalar, qo'ziqorin va mog'or gigienik sirtida ko'paymaydi. Materiallar ekologik xavfsizlik standartlariga javob beradi. Stoleshnitsa, rakovina, dekorativ paneldagi har qanday ifloslanishni olib tashlash oson. Tozalash uchun yumshoq yuvish vositasi bilan artib yuborish kifoya.

Tosh bardoshli va kundalik foydalanish paytida eskirib qolmaydi.

*NEOMARM DASTGOHLAR VA ICHKI QOPLAMALAR ISHLAB CHIQRISH UCHUN SERTIFIKATLANGAN.

Afzalliklari

Bardoshli va ishonchli

Dog'larga chidamli

Noyob marmar dekorlar

Parvarishlashda oson

Choksiz

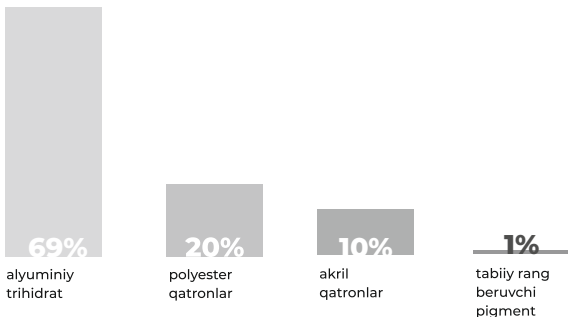

Gigienik va ekologik toza

Hamyonbop

NEOMARM tarkibi

Характеристика

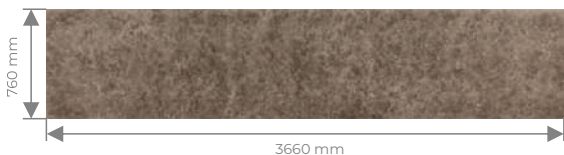

Вес: 60 кг

Партия: 20–80–140 листов

Продажа кратно 0,25 листа

Размер листа серии NM: 3660 x 760 мм, толщина 12 мм

Размер листа серии N, NK, Flex: 3680 x 760 мм, толщина 12 мм

POLYESTER TOSHNING QO'LLANILISH JOYLARI

1

Oshxonalar

Stol usti, deraza tokchalari, lavabolar, apronlar va boshqa bezak elementlarini ishlab chiqarish

2

Hammomlar

Dush idishlari, hammom panellari, devor panellari, shkaflar va javonlar ishlab chiqarish

3

Jamoat joylari

Ofislar, do'konlar, mehmonxonalar va boshqa jamoat joylari uchun interyer ishlab chiqarish

4

Sog'liqni saqlash

Akril tosh gigienik materialdir, shuning uchun u ko'pincha tibbiy va laboratoriya muassasalarida stollar, panellar va boshqa ichki elementlarni ishlab chiqarish uchun ishlatiladi.

5

Mebel va armatura

U nafaqat mebellarni, balki turli xil dekorativ elementlarni, masalan, nometall, javonlar, stendlar va boshqalarni yaratish uchun ishlatilishi mumkin.

6

Oziq-ovqat sektori

Restoranlar, barlar va kafelar uchun stol usti, devor panellari, bar peshtaxtalari va boshqa ichki elementlarni ishlab chiqarish

7

Ichki devor panellari

Yaxshi ovoz o'tkazmaydigan va issiqlik izolyatsiyasi xususiyatlariga ega.

8

Boshqa hududlar

Mehmonxona biznesida dekorativ elementlarni ishlab chiqarish, go'zallik salonlari va SPA-salonlarni bezash, shuningdek, uy interyerida dekorativ elementlarni ishlab chiqarish uchun
